Statement of Compliance

Restriction of Hazardous Substances (RoHS): Directive 2002/95/EC

All integrated circuits from Asahi Kasei EMD Corporation ("AKEMD") assembled in "lead-free" packages* are **fully compliant with RoHS.**

These lead-free version products:

- Contain less than 1000 ppm of Pb, Hg, Cr +6, PBB and PBDE, and less than 100 ppm of Cd.
None of these substances is intentionally included at any concentration.
- Have outer lead plating that contains less than 1000 ppm of Pb, and no intentionally included Pb.

AKEMD can provide copies of analysis data of the materials used in the assembly for each of these products upon request.

(*) RoHS compliant products from AKEMD are identified with "Pb free" letter indication on product label posted on the anti-static shield bag and inner boxes
